

## Low Friction Options

When cables need to be stacked together, or where a lower friction surface is desired, there are two different cable finishes available: GlideRite™ and SlideRite™.

### GlideRite™:

- The lowest friction available, the cable is as slippery as Teflon®
- Compound is chemically bonded to the cable, and will not rub or peel off
- Cable retains all performance characteristics, including temperature range and flexibility (See Tech Note).
- Continuous lengths not available, cable needs to be supplied in 30-80 foot lengths

### SlideRite™:

- Reduced friction, similar to a PVC cable jacket
- Compound is chemically bonded to the cable, and will not rub or peel off
- Cable retains all performance characteristics, including temperature range and flexibility
- Continuous lengths can be coated
- Makes cables slightly cloudy in color

## StripMount™ Integrated Mounting Strip

### Benefits:

- Standard fasteners mount cables to any surface
- Saves space by eliminating cable conduit and cable tie systems
- Fiberglass-reinforced strip has 250 lbs. holding force
- Stackable: Multiple cables can be stacked and secured by a single fastener

StripMount™ is available with any Cicoil cable.

Cicoil's StripMount™ design makes it quick and easy to mount cables to any surface. The patented design allows for holes to be easily punched or drilled through the StripMount™ cable reinforcement at whatever intervals you need. Use any fasteners to attach the cable to any surface. Rather than using expensive, difficult cable management systems, StripMount™ lets you attach cables anywhere. You can even stack up and drill through multiple cables!
