

Cat 8 Ethernet Cable

- 2000 MHz Performance Speeds
- Ideal for 25GBASE-T and 40GBASE-T {25Gb or 40 Gb Networks}
- For dynamic applications, designed for millions of flex cycles
- Exceptional EMI / RFI Suppression

Cicoil's Cat 8A Ethernet Cable meets the increased demands of professionals who need a rugged, flexible and high performance ethernet cable solution.

Cicoil's patented extrusion process allows individually shielded, twisted pairs to be placed in a flexible flat profile for high speed data transmission, with exceptional EMI/RFI suppression. Cicoil's Cat 8 Flat Cable delivers the ultimate in electrical performance, extreme ruggedness, and designed for **millions of flex cycles. (specific to cable)**

Applications

PLC and DCS Automation Networks, Field Level Networking and Ethernet Networks

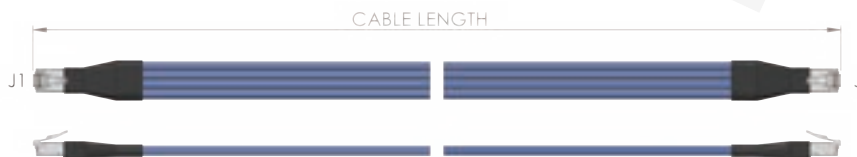

Cable: DC - 800

Amp Rating	Conductor Gauge	No. of Pairs	Dimensions (in.)	
			Width	Height
40	24 AWG	4	0.52	0.15

Note 1. Amp rating is the maximum value for each conductor at room temperature of 70°F (21°C). Amp rating decreases as temperature increases.

Cable Assemblies

Cable Length (feet)	Part Number Addition
3	-CA003
6	-CA006
12	-CA012

Note 2. Append onto base cable, part number for complete assembly. (Example: DC - 800-CA003)

Note 3. Connector ratings may differ from cable ratings; refer to manufacturer specifications.
