

Non-use of Conflict Minerals

Cicoil's flat cables and cables assemblies, to the best of our knowledge, comply with the requirements concerning conflict minerals usage. These requirements are flowed down to our suppliers, as part of our standard purchase order quality requirements.

Cicoil's quality system is audited and certified to ISO9001:2008, AS9100 Rev C. We have been certified to the AS9100 ISO standard since 2004. Cicoil performs all manufacturing at our factory in Valencia, California, and we strive to purchase and use American-made products and materials whenever possible in our products and in our facility.
